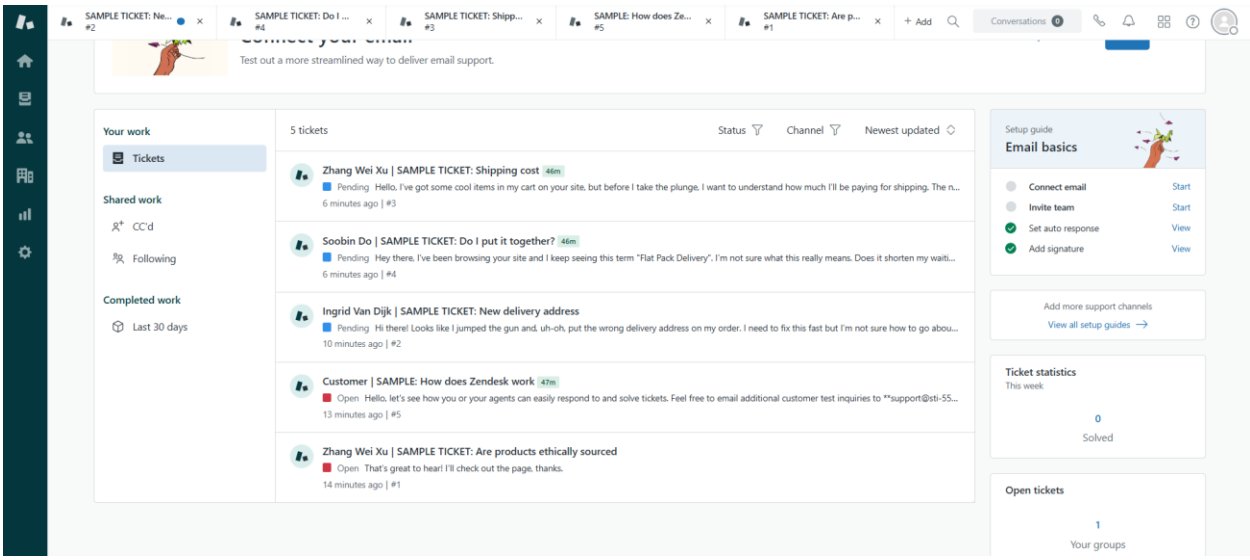
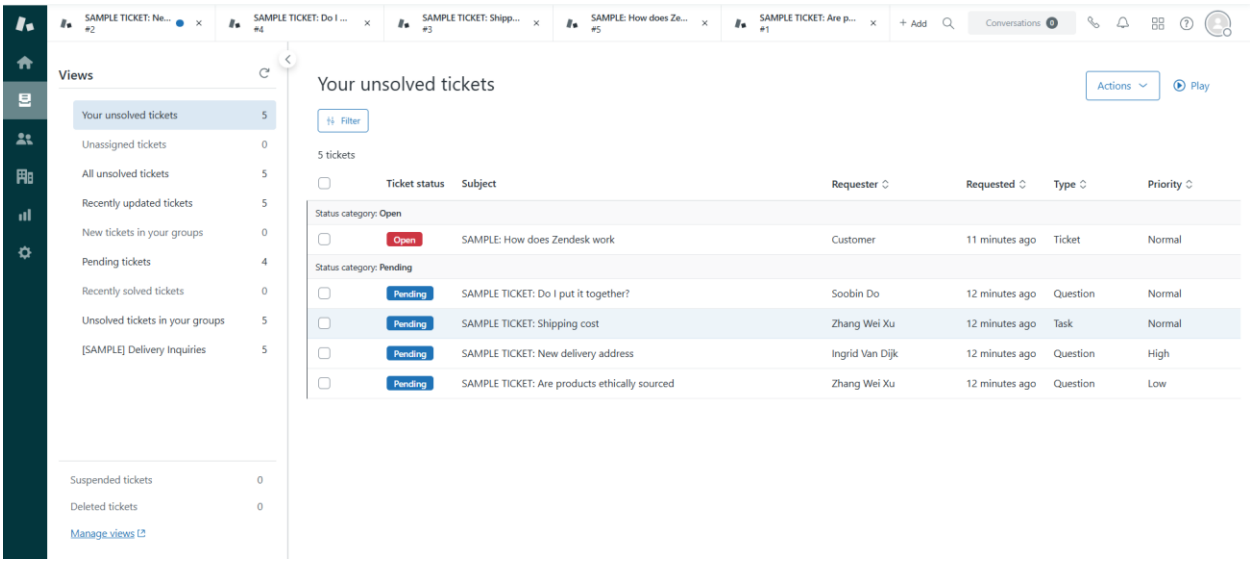
01 Assignment 1 – ARG

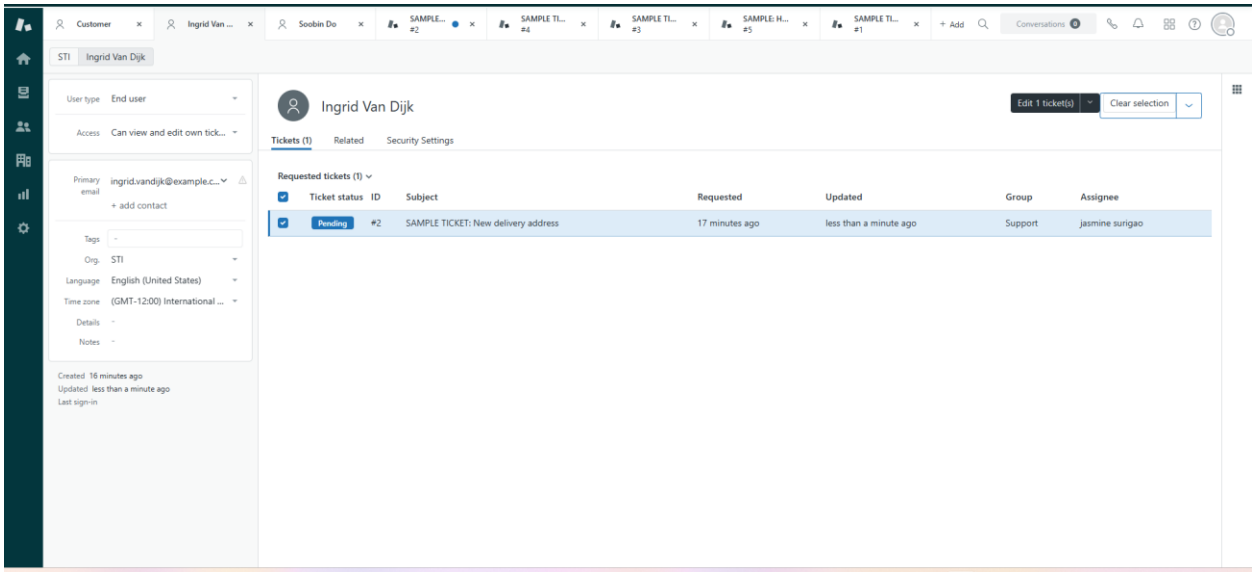
1. Clicking the Dashboard will display unresolved and unassigned sample ticket requests. Assign each request's Type (Question, Incident, Problem, Task) and Priority (Low, Normal, High, Urgent) based on their attached message/concern. Include a screenshot. See the image below as a reference format.



2. Using the exact sample ticket requests, set the status of four (4) tickets from Open to Pending. Go to Views and attach a screenshot of the requests. Make sure the Type of ticket is shown



3. Go to Customers, select one (1) customer, and edit their information (Tags, Org., Time zone, Details). Send a screenshot of their filled-up user profile.



4. In at least three (3) sentences, comment on the tool's user interface based on its functionality, features, and userfriendliness.

   - The website was easy to understand, navigation was also easy, even without any training or instruction its navigation was easy, the features were straight forward, which is good in avoiding user confusion, although the interface or design of the website for me was somewhat outdated
